SCHOOLS OF EXCELLENCE WITH CHOICE BASED CREDIT SYSTEM (CBCS) UNDERGRADUATE COURSES

St. Joseph's College (Autonomous), an esteemed institution in the realm of higher education in India, has embarked on a journey to uphold and perpetuate academic excellence. One of the pivotal initiatives in this pursuit is the establishment of five Schools of Excellence commencing from the academic year 2014-15. These schools are strategically designed to confront and surpass the challenges posed by the 21st century.

Each School amalgamates correlated disciplines under a unified umbrella, fostering synergy and coherence. This integrated approach fosters the optimal utilization of both human expertise and infrastructural assets. Moreover, it facilitates academic fluidity and augments employability by nurturing a dynamic environment conducive to learning and innovation. Importantly, while promoting collaboration and interdisciplinary study, the Schools of Excellence also uphold the individual identity, autonomy, and distinctiveness of every department within.

The overarching objectives of these five schools are as follows:

1. Optimal Resource Utilization: Ensuring the efficient use of both human and material resources to foster academic flexibility and attain excellence across disciplines.

2. Horizontal Mobility for Students: Providing students with the freedom to choose courses aligning with their interests and facilitating credit transfers, thereby enhancing their academic mobility and enriching their learning experience.

3. Credit-Transfer Across Disciplines (CTAD): The existing curricular structure, in accordance with regulations from entities such as TANSCHE and other higher educational institutions, facilitates seamless credit transfers across diverse disciplines. This underscores the adaptability and uniqueness of the choice-based credit system.

4. Promotion of Human Excellence: Nurturing excellence in specialized areas through focused attention and resources, thus empowering individuals to excel in their respective fields.

5. Emphasis on Internships and Projects: Encouraging students to engage in internships and projects, serving as stepping stones toward research endeavors, thereby fostering a culture of inquiry and innovation.

6. Addressing Stakeholder Needs: The multi-disciplinary nature of the School System is tailored to meet the requirements of various stakeholders, particularly employers, by equipping students with versatile skills and competencies essential for success in the contemporary professional landscape.

In essence, the Schools of Excellence at St. Joseph's College (Autonomous) epitomize a holistic approach towards education, aiming not only to impart knowledge but also to cultivate critical thinking, creativity, and adaptability – qualities indispensable for thriving in the dynamic global arena of the 21st century.

Credit system

The credit system at St. Joseph's College (Autonomous) assigns weightage to courses based on the hours allocated to each course. Typically, one credit is equivalent to one hour of instruction per week. However, credits are awarded regardless of actual teaching hours to ensure consistency and adherence to guidelines.

The credits and hours allotted to each course within a programme are detailed in the Programme Pattern table. While the table provides a framework, there may be some flexibility due to practical sessions, field visits, tutorials, and the nature of project work.

For undergraduate (UG) courses, students are required to accumulate a minimum of 137 credits, as stipulated in the programme pattern table. The total number of courses offered by the department is outlined in the Programme Structure.

OUTCOME-BASED EDUCATION (OBE)

OBE is an educational approach that revolves around clearly defined goals or outcomes for every aspect of the educational system. The primary aim is for each student to successfully achieve these predetermined outcomes by the culmination of their educational journey. Unlike traditional methods, OBE does not prescribe a singular teaching style or assessment format. Instead, classes, activities, and evaluations are structured to support students in attaining the specified outcomes effectively.

In OBE, the emphasis lies on measurable outcomes, allowing educational institutions to establish their own set of objectives tailored to their unique context and priorities. The overarching objective of OBE is to establish a direct link between education and employability, ensuring that students acquire the necessary skills and competencies sought after by employers.

OBE fosters a student-centric approach to teaching and learning, where the delivery of courses and assessments are meticulously planned to align with the predetermined objectives and outcomes. It places significant emphasis on evaluating student performance at various levels to gauge their progress and proficiency in meeting the desired outcomes.

Here are some key aspects of Outcome-Based Education:

Course: A course refers to a theory, practical, or a combination of both that is done within a semester.

Course Outcomes (COs): These are statements that delineate the significant and essential learning outcomes that learners should have achieved and can reliably demonstrate by the conclusion of a course. Typically, three or more course outcomes are specified for each course, depending on its importance.

Programme: This term pertains to the specialization or discipline of a degree programme.

Programme Outcomes (POs): POs are statements that articulate what students are expected to be capable of by the time they graduate. These outcomes are closely aligned with Graduate Attributes.

Programme Specific Outcomes (PSOs): PSOs outline the specific skills and abilities that students should possess upon graduation within a particular discipline or specialization.

Programme Educational Objectives (PEOs): PEOs encapsulate the expected accomplishments of graduates in their careers, particularly highlighting what they are expected to achieve and perform during the initial years postgraduation.

LEARNING OUTCOME-BASED CURRICULUM FRAMEWORK (LOCF)

The Learning Outcomes-Centric Framework (LOCF) places the learning outcomes at the forefront of curriculum design and execution. It underscores the importance of ensuring that these outcomes are clear, measurable, and relevant. LOCF orchestrates teaching methodologies, evaluations, and activities in direct correlation with these outcomes. Furthermore, LOCF adopts a backward design approach, focusing on defining precise and attainable learning objectives. The goal is to create a cohesive framework where every educational element is in harmony with these outcomes.

Assessment practices within LOCF are intricately linked to the established learning objectives. Evaluations are crafted to gauge students' achievement of these outcomes accurately. Emphasis is often placed on employing authentic assessment methods, allowing students to showcase their learning in real-life scenarios. Additionally, LOCF frameworks emphasize flexibility and adaptability, enabling educators to tailor curriculum and instructional approaches to suit the diverse needs of students while ensuring alignment with the defined learning outcomes.

Some Important Terminologies

Core Course (CC): *Core Courses represent obligatory elements within an academic programme, imparting fundamental knowledge within the primary discipline while ensuring consistency and acknowledgment.*

Allied Course (AC): *Allied Courses complement primary disciplines by furnishing supplementary knowledge, enriching students' understanding and skill repertoire within their academic pursuit.*

Skill Enhancement Course (SEC): *Skill Enhancement Courses aim to nurture students' abilities and competencies through practical training, open to students across disciplines but particularly advantageous for those in programme-related fields.*

Value Education (VE): *Value education encompasses the teaching of moral, ethical, and social values to students, aiming to foster their holistic development. It instills virtues such as empathy, integrity, and responsibility, guiding students towards becoming morally upright and socially responsible members of society.*

Ability Enhancement Compulsory Course (AECC): *Ability Enhancement Compulsory Course is designed to enhance students' knowledge and skills; examples include Communicative English and Environmental Science. These courses are obligatory for all disciplines.*

AE-1: Communicative English: This three-credit mandatory course, offered by the Department of English during the first semester of the degree programme, is conducted outside regular class hours.

AE-2: Environmental Science: This one-credit compulsory course, offered during the second semester by the Department of Human Excellence, emphasizes environmental awareness and stewardship.

Allied Optional (AO): *Allied optional course are elective modules that complement the primary disciplines by providing additional knowledge and skills. These courses allow students to explore areas of interest outside their major field of study, broadening their understanding and enhancing their skill set.*

Discipline Specific Elective (DSE): *These courses offer the flexibility of selection of options from a pool of courses. These are considered specialized or advanced to that particular programme and provide extensive exposure in the area chosen; these are also more applied in nature. Four courses are offered, two courses each in semester V and VI*

Note: To offer one DSE, a minimum of two courses of equal importance/weightage is a must. A department with two sections must offer two courses to the students.

Open Elective (OE): *A course chosen from a different discipline or subject area, typically to gain exposure. Students pursuing specific disciplines must select Open Elective courses from the options available across departments as per the college's course offerings. The breadth of Open Elective (OE) Courses is directly linked to the diversity of disciplines offered by the college. Two OE Courses are available, one in each semester V and VI, and are open to students from other departments.*

Self-Learning (SL): *A two-credit course designed to foster students' ability for independent and self-directed learning. There are* Four Self-Learning Courses:

- *Compulsory MOOC on NPTEL-SWAYAM in Semester I or II*
- 'Artificial Intelligence' *as a Self-Learning Course jointly offered by the Departments of CS, AI, IT and Data Science on JosTEL in Semester III*
- *A Department-Specific Self-Learning Course in Semester IV on JosTEL*
- *A Certificate Course in Semester V: Each department will offer ONE certificate Course (45 – 60 hours) that will be creditised in the curriculum.*

Internship (IS): *Following the fourth semester, students are required to undertake an internship during the summer break. Subsequently, they must submit a comprehensive report detailing their internship experience along with requisite documentation. Additionally, students are expected to participate in a viva-voce examination during the fifth semester. Credits for the internship will be reflected in the mark statement for the fifth semester. One of the Core Courses in Sem IV is offered as internship embedded course which contains content related to industry.*

Experiential Learning (EL): *In the sixth semester, students are required to undertake a one credit Project / Industrial visit / Field visit chosen by the department. This component is intended to foster learning by direct experience and application of acquired knowledge to practical settings.*

Comprehensive Examination (CE): *A detailed syllabus consisting of five units to be chosen from the courses offered over the five semesters which are of immense importance and those portions which could not be accommodated in the regular syllabus.*

Extra Credit Courses: *To support students in acquiring knowledge and skills through online platforms such as Massive Open Online Courses (MOOCs), additional credits are granted upon verification of course completion. These extra credits can be availed across five semesters (2 - 6). In line with UGC guidelines, students are encouraged to enhance their learning by enrolling in MOOCs offered by portals like SWAYAM, NPTEL, and others. Additionally, certificate courses provided by the college also qualify for these extra credits.*

Outreach Programme (OR): *It is a compulsory course to create a sense of social concern among all the students and to inspire them to dedicated service to the needy.*

Grading System

The marks obtained in the CIA and semester for each course will be graded as per the scheme provided in Table - 1.

From the second semester onwards, the total performance within a semester and the continuous performance starting from the first semester are indicated by Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA), respectively. These two are calculated by the following formulae:

$$SGPA\ and\ CGPA = \frac{\sum_{i=1}^{n} C_i Gp_i}{\sum_{i=1}^{n} C_i}$$

$$WAM = \frac{\sum_{i=1}^{n} C_i M_i}{\sum_{i=1}^{n} C_i}$$

Where,

Ci - credit earned for the Course i

Gpi - Grade Point obtained for the Course i

Mi - Marks obtained for the Course i

*n - Number of Courses **passed** in that semester*

WAM - Weighted Average Marks

Classification of Final Results

- For each of the first three parts in the UG Programme, there shall be separate classification on the basis of CGPA, as indicated in Table - 2.
- For the purpose of declaring a candidate to have qualified for the Degree of Bachelor of Arts / Science / Commerce / Management as Outstanding / Excellent / Very Good / Good / Above Average / Average, the marks and the corresponding CGPA earned by the candidate in Part III alone will be the criterion, provided the candidate has secured the prescribed passing minimum in all the five Parts of the programme.
- Grade in Part IV and Part V shall be shown separately and it shall not be taken into account for classification.

- A pass in SHEPHERD will continue to be mandatory although the marks will not be counted for the calculation of the CGPA.
- Absence from an examination shall not be considered as an attempt.

Table - 1: Grading of the Courses

Mark Range	Grade Point	Corresponding Grade
90 and above	10	O
80 and above and below 90	9	A+
70 and above and below 80	8	A
60 and above and below 70	7	B+
50 and above and below 60	6	B
40 and above and below 50	5	C
Below 40	0	RA

Table - 2: Grading of the Final Performance

CGPA	Grade	Performance
9.00 and above	O	Outstanding*
8.00 to 8.99	A+	Excellent*
7.00 to 7.99	A	Very Good
6.00 to 6.99	B+	Good
5.00 to 5.99	B	Above Average
4.00 to 4.99	C	Average
Below 4.00	RA	Re-appear

**The Candidates who have passed in the first appearance and within the prescribed duration of the UG programme are eligible. If the Candidates Grade is O/A+ with more than one attempt, the performance is considered "Very Good".*

Vision

Forming globally competent, committed, compassionate and holistic persons, to be men and women for others, promoting a just society.

Mission

To Work with Data Types, Variables, Operators and Apply various operators and expressions for problem-solving.
To Implement Control Structures and looping for Decision Making.
To Apply Functions and Advanced Data Structures
To Learn and implement the concepts of pointers, structures.

UNIT 1: Introduction to C **(9 Hours)**

Introduction to C Language: Introduction-Features of C Language-Benefits of C over other languages - Compilation of C Program-First Program in C – Preprocessor in C-Preprocessor directives.

UNIT 2: C Data types and Operators **(9 Hours)**

Variables, Data Types and Operators: Variables and Keywords in C-Scope rules in C-Data Types in C-Operators and Its Types-Typecasting in C

UNIT 3: Control Structures **(9 Hours)**

Control Flow Statements: Decision Making Statements-Switch Statement in C-C Loops and Control Structure - Practice problems -Continue Statement, Break Statement - Array & String Handling in C: Arrays in C-Strings in C

UNIT 4: Arrays and Functions **(9 Hours)**

Multidimensional Arrays in C-String functions in C- Practice problems - Functions in C-Function Prototype-Parameter Passing Techniques in C-Storage Classes in C-Recursion Concept -Functions in C - Practice problems

UNIT 5: Pointers and Structures **(9 Hours)**

Pointers, Structures and Unions: Pointers in C-Structures- Union - Enumeration (or enum) in C- Pointer Vs Array in C – C application programs (Sorting, Matrix manipulations, student's mark list preparation)

To describe the basics of SQL
To emphasize the importance of SQL joins and transactions
To analyze the SQL functions and procedures

UNIT-I: Introduction (9 Hours)

Database-System Applications- Purpose of Database Systems- View of Data- Database Languages- Relational Databases- Database Design- Data Storage and Querying- transaction Management- Database Architecture- Data Mining and Information Retrieval- Specialty Database- Database Users and Administrators.

UNIT – II: Introduction to the Relational Model: (9 Hours)

Structure of Relational Databases-Database Schema-Keys-Schema Diagrams-Relational Query Languages-Relational Operations.

UNIT – III: SQL (9 Hours)

Introduction – Overview of the SQL Query Language-SQL Data Definition-Basic Structure of SQL Queries - Additional Basic Operation - Set Operations- Null Values- Aggregate Functions - Nested Sub queries.

UNIT– IV: Intermediate SQL (9 Hours)

Join Expressions- Views –transactions - Integrity Constraints-SQL Data Types and Schemas-Authorization: Granting and Revoking of Privileges- roles-Authorization on Views-Authorizations on Schema-Transfer of Privileges-Revoking of Privileges.

UNIT – V: Advanced SQL: (9 Hours)

Accessing SQL From a Programming Language- Functions and Procedures-Triggers-Recursive Queries-Advanced Aggregation Features.

Teaching Methodology	Chalk and talk, PPT, Videos, Demonstration
Assessment Methods	Chalk and board, MCQ, diagnostic assessment

To provide basic knowledge of Mathematics to the students who did not study Mathematics at the higher secondary level.
To train the students in the working techniques of various branches of Mathematics.
To train the students to understand the concept of permutation and combination problems.
To train the students to know about the Applications of Matrices.
To motivate the students to get the basic knowledge of AP and GP.

UNIT I **(18 Hours)**

Indices - Positive indices - Fractional indices - Operations with power functions (simple problems only)

UNIT II **(18 Hours)**

Logarithms - Laws and operations - Change of base (simple problems only)

UNIT III **(18 Hours)**

Permutations - Factorial Notations - Permutation of n different things - Circular permutation - Permutation of things not all different - Restricted permutation - Combinations - Complementary Theorems - Restricted combinations (concepts & simple problems only)

UNIT IV **(18 Hours)**

Arithmetic progression - Sum of a series in A.P - Geometric progression - Sum of a series in G.P (simple problems only).

UNIT V **(18 Hours)**

Matrices - types of matrices - scalar multiplication of a matrix - equality of matrix - matrix operations - addition and subtraction properties - multiplication properties - Transpose of a matrix - determinants of a square matrix of order 2 and 3 - Cramer's rule - solution of three linear equations - inverse of a matrix - simultaneous equations two variables only (simple problems only).

Course Objectives
To help students enhance communication skills for business economics analysis.
To facilitate effective cross-cultural and global business communication among students.
To improve students' persuasive communication and decision-making skills in business contexts.
To introduce business communication to students for technological advancements.
To equip students with the skills to write formal documents professionally.

UNIT I: Business Economics **(15 Hours)**

Themes:
1. Microeconomics vs. Macroeconomics in Business
2. Demand and Supply Analysis
3. Market Structures and Competition
4. Cost-Production and Profit Maximization
5. Monopolies and Oligopolies: Implications for Business

Skill-Focus: *Listening attentively and providing appropriate feedback, Telephonic greeting, Persuading colleagues/clients, Communicating findings or progress to stakeholders*

UNIT II: Globalization and Its Impact on Business **(15 Hours)**

Themes:
6. Globalization: Trends and Emerging Markets
7. The Role of Multinational Corporations in Globalization
8. Globalization and Market Expansion Strategies
9. Global Labor Markets: Outsourcing and Offshoring
10. Globalization and the Rise of E-Commerce

Skill-Focus: *Listening for intent, Making predictions, Communicating professionally and empathetically with customers, Reviewing and revising text to correct errors, Writing in active voice*

UNIT III: Corporate Social Responsibility **(15 Hours)**

Themes:
11. Corporate Social Responsibility (CSR) in the Age of Social Media
12. Philanthropy and Social Impact
13. CSR and Stakeholder Engagement
14. Global CSR Practices: Differences Across Cultures and Regions
15. The Role of CSR in Crisis Management and Reputation Recovery

Skill-Focus: *Recognizing supporting details, Selecting appropriate words for the context, Crafting social media posts, Handling difficult conversations with stakeholders*

UNIT IV: Technology and Business **(15 Hours)**

Themes:
16. The Impact of Artificial Intelligence on Business Operations
17. Digital Transformation and Its Role in Business Growth
18. Cybersecurity Challenges in the Digital Age
19. The Future of E-Commerce and Digital Business Models
20. Technology-Driven Innovation in Product Development

Skill-Focus: *Highlighting key information, Writing executive summaries of data insights, Offering brief recaps of key points, Using narratives to make complex ideas more relatable and memorable*

UNIT V: Sustainability and Green Business **(15 Hours)**

Themes:
21. The Role of Sustainable Practices in Business Strategy
22. Green Business Models: Integrating Sustainability into Profitability
23. Corporate Environmental Responsibility: Best Practices
24. Circular Economy: Redefining Waste and Resource Use in Business
25. The Future of Sustainable Innovation in Business Practices

Skill-Focus: *Instructional writing, Questioning to gather more information or gain deeper understanding, Tailoring language, Tone and style, Evaluating and comparing best practices from different companies, Describing and explaining green business practices*

Teaching Methodology	Lectures, Case Studies, Discussions, Reading Tasks, Writing Exercises, Workshops, Role-Playing, Group Projects, Debates, Storytelling Sessions
Assessment Methods	Seminars, Reports, Exhibits

Course Objectives
To help students to explain basic concepts, importance & functions of Management Accounting
To obtain a basic understanding of managerial accounting concepts
To Develop an understanding of the role of activity-based costing and management in decision making
To understand the future requirement of the business
To analyze the periodical financial statements

UNIT-I: INTRODUCTION (18 Hours)

Management Accounting - Introduction and scope – Objectives – Analysis of financial statements; Common size and comparative financial statements, Trend percentages

UNIT – II: RATIO ANALYSIS (18 Hours)

Meaning of ratio –steps in ratio analysis-classification of ratios –profitability ratios- turnover ratios-solvency ratios or financial ratios

UNIT-III: FUNDS FLOW AND CASH FLOW (18 Hours)

Fund Flow Analysis: Introduction - Funds Flow Statement-Ascertainment of flow of funds- Technique of preparing funds flow statement- Schedule of Changes in Working Capital- Adjusted Profit and Loss account: Cash Flow Statements – Advantages – Limitations – Preparation of Cash Flow Statement.

UNIT -IV: CAPITAL BUDGETING (18 Hours)

Capital budgeting – meaning and concepts – capital budgeting process – appraisal – criteria – Pay back method - Discounted cash flow Techniques – ARR, IRR, - method –PV factor- NPV and Profitability index method.

UNIT -V: MARGINAL COSTING (18 Hours)

Marginal Costing- Concept –Cost Volume Profit analysis: fixed cost-variable cost – contribution - Break Even Analysis - Profit Volumes Ratio- Margin of safety

Theory 20% Problems 80%

Course Objectives
To implement and work with various data structures in R.
To extract data from multiple sources and utilize it for comprehensive data analysis.
To visualize and summarize data effectively using R.
To perform statistical computations and apply data analysis techniques in R.
To generate insightful reports and dashboards using R-based visualization tools.

UNIT-I: BIG DATA OVERVIEW (9 Hours)

Big Data - Data Structures - Analyst Perspective on Data Repositories- State of the Practice in Analytics - BI Versus Data Science - Current Analytical Architecture- Drivers of Big Data- Emerging Big Data Ecosystem and a New Approach to Analytics- Key Roles for the New Big Data Ecosystem- Examples of Big Data Analytics - Data Analytics Life Cycle: Data Analytics Life Cycle Overview-Discovery-Data preparation-Model planning-Model building-Communicate Results-Operationalize-Case Study: Global Innovation Network and Analysis (GINA).

UNIT-II: BASICS OF R (9 Hours)

Introduction- downloading and installing R-IDEs and text editors- handling packages in R Getting started with R: Loading and handling data in R-Challenges in Analytical Data Processing-Expression, Variables Functions- Missing Values treatment in R- Using the 'as" Operator in R- Vectors-Matrices-List. Case Study: Dealing with Missing Data in R

UNIT -III: FUNCTIONS OF R (9 Hours)

Aggregating and group processing of variable- Simple analysis using R- Methods for reading Data- Using R with Databases and Business Intelligence systems. Mathematical and statistical functions -Character functions -Looping and conditional execution -User-written functions -Ways to aggregate and reshape Case Study: Data Analytics in R: A Case Study Based Approach

UNIT- IV: DATA ANALYSIS (9 Hours)

Data Frames- R functions for understanding data in Data Frames-Load Data Frames-Invalid values and outliers -Descriptive Statistics- Analysis of Variance and Correlation- Basics of Linear Regression-Classification.

UNIT-V: DATA VISUALIZATION (9 Hours)

Exploratory Analysis with base graphics tools in R (box plots, bar charts, line plots, heat map, etc.) Customize plot axes, labels, add legends, and add colors- Data Analysis Descriptive Statistics- Spotting problems with Data and Visualization.

To perform statistical computations and apply data analysis techniques in R.
To generate insightful reports and dashboards using R-based visualization tools.

List of Programs:

1. To write an R program to create and display different data types (numeric, character, logical, and factor) using the typeof() function.
2. To perform arithmetic operations (+, -, *, /, %%, %/%) and display the results.
3. To implement relational (==, !=, >, <, >=, <=) and logical (&&, ||, !) operators in R.
4. To convert one data type to another (numeric to character, character to factor, etc.) using as.numeric(), as.character(), and as.factor().
5. To generate sequences using seq(from, to, by) and rep(value, times) functions.
6. To create and manipulate vectors using c(), append(), and length().
7. To define and invoke a function to add two numbers in R using function ().
8. To write an R program to check whether a given number is even or odd using an if-else statement.
9. To write an R program to generate the first 10 Fibonacci numbers using a for loop.
10. To create a numeric vector and access elements using positive and negative indexing.
11. To perform element-wise operations (addition, subtraction, multiplication, division) on vectors.
12. To create and manipulate a list containing numeric, character, and logical values, and access elements using names and indexing.
13. To create a matrix using matrix() and perform addition, subtraction, and multiplication of matrices.
14. To extract specific rows and columns from a matrix using indexing and slicing.
15. To create a data frame manually and display its structure using str () and summary().
16. To filter specific rows from a data frame based on conditions using the subset () function.
17. To apply functions (mean(), sum(), min(), max()) across data frame columns using apply().
18. To create a histogram to visualize the distribution of a numeric variable using ggplot2.
19. To create a scatter plot to show the relationship between two variables and add a trend line using geom_point() and geom_smooth().

To motivate the students by using the SPSS software for statistical measures.
To train the students in mastering the techniques and tools of Statistics.
To motivate the students to apply the techniques in their major subject.

UNIT I **(18 Hours)**

Measures of central tendency: arithmetic mean, median, mode - computation of individual, discrete and continuous series - Measures of dispersion: standard deviation - coefficient of variation (simple problems & business applications only)

UNIT II **(18 Hours)**

Measures of Skewness - computation of Karl Pearson's coefficient of skewness - Correlation analysis - types of correlation - Karl Pearson's coefficient of correlation & its calculation - rank correlation coefficient without tie in ranks (simple problems & business applications only)

UNIT III **(18 Hours)**

Index numbers - Methods of constructing indices - simple aggregative method - Weighted aggregative indices - Laspeyre's, Paasche's, Bowley's& Fisher's ideal method - quantity & value indices - Time series analysis - components - method of least squares - fitting a straight-line trend only (simple problems & business applications only)

UNIT IV **(18 Hours)**

Probability - concepts of probability - applications of addition theorem & multiplication theorem (no proofs, simple problems & business applications only)

5	25UCC53CP05	**Core Practical - 5:** Python Programming	3	2

Course Objectives
To understand the structure of a Python program and its execution process.
To demonstrate the use of variables, operators, and expressions.
To explain and implement Decision making statements.
To define and call functions, including built-in and user-defined functions.
To explain the purpose and use of Python modules.

List of Exercises

1. write a simple program using variables
2. write a program to implement operators
3. write a program to implement various data structures
4. write a program using Conditional Statements
5. write a program using Loops
6. write a program using Jump Statements
7. write a program using Functions and Recursion
8. write a program using Arrays
9. write a program using Strings
10. write a program using Modules

5	25UCC53CC11	**Core Course - 11:** Research Methodology	6	3

Course Objectives
To introduce the fundamental concepts and significance of research methodology in academic and professional contexts
To familiarize students with various research designs and methodologies applicable to different disciplines.
To develop skills for data collection, analysis, and interpretation using appropriate research tools.
To understand the ethical considerations and reporting standards in research.
To enable students to design and execute a complete research project from problem identification to report writing.

UNIT I: Introduction to Research Methodology (18 Hours)

Meaning, Objectives, and Significance of Research - Types of Research: Basic, Applied, Descriptive, Analytical, and Exploratory - Research Process: An Overview Identification and Formulation of Research Problem - Review of Literature and Its Importance

UNIT II: Research Design and Planning (18 Hours)

Meaning and Importance of Research Design - Features of a Good Research Design - Types of Research Design: Exploratory, Descriptive, Diagnostic, and Experimental - Hypothesis Formulation and Testing - Sampling Techniques and Sample Size Determination

UNIT III: Data Collection Methods (18 Hours)

Types of Data: Primary and Secondary - Methods of Data Collection: Observation, Interview, Questionnaire, and Schedule - Scaling Techniques and Measurement in Research - Reliability and Validity of Data - Ethical Issues in Data Collection

UNIT IV: Data Analysis and Interpretation (18 Hours)

Processing and Preparation of Data for Analysis - Descriptive and Inferential Statistical Techniques- Use of Software Tools for Data Analysis (e.g., SPSS, Excel)- Interpretation of Results and Drawing Conclusions - Report Writing: Structure, Content, and Referencing Styles

UNIT V: Presentation and Ethical Aspects of Research (18 Hours)

Presentation of Research Findings: - Plagiarism and Academic Integrity in Research - Ethical Guidelines in Conducting Research - Limitations of Research and Future Research Directions Role of Research in Policy Formulation and Business Decisions

Teaching Methodology	Interactive lectures supplemented with multimedia presentations - Hands-on workshops on data analysis tools and techniques - Group discussions and presentations on research case studies - Practical assignments involving literature reviews and research proposal writing. -Expert talks from industry professionals and researchers on contemporary research trends.

Semester	Course Code	Title of the Course	Hours/Week	Credits
5	25UCC53ES01A	**Discipline Specific Elective - 1:** Accounts Assistant (NSQF Based paper)	4	3

Course Objectives
To Analyze different types of tax liabilities, evaluate tax compliance documents, and prepare tax challans to execute accurate tax payments.
To learn to Collect and verify income tax declarations from employees, compute net salaries after deductions, and prepare detailed salary statements showing earnings and deductions.
To Examine receipt and payment documents, record financial transactions systematically in the books of accounts, prepare reconciliation statements, and implement effective cash and inventory management practices.
To Prepare provisions under various accounting heads, calculate depreciation, and summarize financial results through simple statements such as the Profit and Loss Account and Balance Sheet.
To Demonstrate effective communication with customers, superiors, and colleagues; maintain a strong service orientation; and ensure customer satisfaction in all professional interactions.

UNIT I: Introduction to Accounts Assistant (12 Hours)

Objective of Accounts Assistant – Duties and Responsibilities of Accounts Assistant – Requirement of Accounts Assistant

UNIT II: Financial Accounting and Reporting (12 Hours)

Discuss Basic Accounting concepts and Accounting Terminologies – Explain Book Keeping – Discuss the Elements of Financial Statement – Explain Bank Reconciliation Statement – Narrate Trail Balance – Describe Trading and Profit and Loss Account – Cash flow and Fund Flow statement – Ratio Analysis – Discuss Balance sheet **and practical on**: Preparation of receipts and payment accounts with the Help of Online Practical Tool – Preparation of Income and expenditure statements with the Help of Online Practical Tool – Preparation of Income Statement – Prepare Balance sheet with the Help of Online Practical Tool – Prepare Cash Flow Statement – Preparation of Equity statement with the Help of Online Practical Tool – Calculation of Ratios

UNIT III: Labor Laws and Payroll Accounting (12 Hours)

Explain Contract Act – Law of Payment of Wages Act and Minimum Wages Act – Law of Employees' State Insurance Act – Discuss Applicability of ESIC – Explain Provident Fund Act – Identify Applicability of EPFO – Discuss Payment of Bonus Act – Describe Payment Gratuity Act – Explain Payroll Accounting **and practical on**: Preparation of Employees Register – Computation of Salary – Computation of Deduction from salary – Registration of ESIC – Registration of EPFO – Online PAN application

UNIT IV: Income under Income Tax act 1961 (12 Hours)

Discuss Overview of Income Tax – Identify the Steps for Computing Total Income – Discuss the Tax Rate – Narrate the Residential Status – Discuss the Heads of Income – Explain the Clubbing of Income – Describe set off losses and carryforward losses – Narrate TDS, TCS and Advance Tax – Over view of Chapter VI A – Discuss the Deductions U/S 80C to 80U – Describe PAN – Explain steps of Income Tax Return – Discuss Assessment Procedure – Narrate Interest and Penalty – Identify the Steps for Income Tax Refund – Explain Presumptive Tax **and Practical on**: Computation of Total Income – Calculation of Tax Liability – Calculations and Computations of Deductions – Online PAN registration for ITR filing – Filing of ITR1, ITR2, ITR3, ITR4, ITR5, ITR6, ITR7

UNIT V: Employability Skills (12 Hours)

Discuss employability skills required for jobs in various industries – Explain ways to explore learning and employability portals – Discuss the significance of legal values, including civic rights and duties, citizenship, responsibility towards society etc. And personal values and ethics such as honesty, integrity, caring and respecting others, etc. – Explain the significance of 21st century skills for employment – Describe the benefits of the continuous learning – Explain how to read and understand routine information, notes, instructions, mails, letters etc. Written in English – List the difference between job and career – Communicate and behave appropriately with all genders and pwd – Discuss how to escalate any issues related to sexual harassment at workplace according to posh act – List common components of salary and

compute income, expenses, taxes, investments etc – Discuss relevant rights and laws and use legal aids to fight against legal exploitation – Identify and list different types of entrepreneurship and enterprises and assess opportunities for potential business through research – Identify and list sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity – Explain how to identify different types of customers – Identify and list apprenticeship opportunities and register for it as per guidelines and requirements **and Practical on**: Demonstrate how to follow environmentally sustainable practices – Role play the 21st century skills such as self-awareness, behaviour skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. In personal and professional life – Practice the use basic English for everyday conversation in different contexts, in person and over the telephone – Write short messages, notes, letters, e-mails etc. In English – Prepare a sample career development plan with short- and long-term goals, based on aptitude – Practice following verbal and non-verbal communication etiquette and active listening techniques in various settings – Roleplay how to work collaboratively with others in a team – Roleplay how to escalate any issues related to sexual harassment at workplace according to posh act – Show how to select financial institutions, products and services as per requirement – Practice how to carry out offline and online financial transactions, safely and securely – Operate digital devices and carry out basic internet operations securely and safely – Demonstrate the use of e- mail and social media platforms and virtual collaboration tools to work effectively – Practice the of use basic features of word processor, spreadsheets, and presentations – Develop a sample business plan and a work model, considering the 4ps of marketing product, price, place and promotion – Role play how to respond to customer requests and needs in a professional manner – Show how to follow appropriate hygiene and grooming standards – Create a sample professional curriculum vitae (résumé) – Practice how to search for suitable jobs using reliable offline and online sources such as employment exchange, recruitment agencies, newspapers etc. And job portals, respectively – Show how to apply to identified job openings using offline /online methods as per requirement – Demonstrate how to answer questions politely, with clarity and confidence, during recruitment and selection.

Classroom Aids

Training kit (Trainer guide, Presentations), White board, Marker, Projector screen, Power Point – Presentation Laptop with charger, Participant Handbook and Related Standard Operating – Procedures, 2.1 Laptop External Speakers

Tools, Equipment and Other Requirements:

Sample customer portfolio, Customer's FAQ, NFO (New Fund Offering), Sample comparative analysis report, PPE, Basic Stationary, digital devices as per the requirement

Course Objectives
To understand the fundamentals of Machine Learning and its applications in commerce and accounting.
To differentiate between AI, ML, and Data Science and explore various ML techniques.
To apply data preprocessing, feature engineering, and data transformation techniques for financial and business applications.
To implement supervised and unsupervised learning models for tasks such as fraud detection and customer segmentation.
To utilize ML tools like Python, R, and AutoML for business decision-making and predictive analytics.

UNIT I: Machine Learning and Applications in Commerce (12 Hours)

Basics of Machine Learning (ML) – Differences between **Artificial Intelligence (AI), Machine Learning, and Data Science** – Types of Machine Learning: **Supervised, Unsupervised, and Reinforcement Learning** – Role of ML in Commerce and Accounting – Applications in Finance, Taxation, and Business Analytics – **Introduction to Artificial Intelligence and its basic applications in business.**

UNIT II: Data Preprocessing and Feature Engineering (12 Hours)

Understanding Data: **Structured vs. Unstructured Data** – Data Cleaning and Handling Missing Values – Feature Engineering and Feature Selection – Data Normalization and Standardization – Importance of Data in Commerce: **Financial and Customer Data Processing – Role of AI in data processing and automation.**

UNIT III: Supervised Learning Techniques (12 Hours)

Introduction to Regression **(Linear & Logistic)** – Classification Algorithms **(Decision Trees, Random Forest, Naïve Bayes)** – Performance Metrics: **Accuracy, Precision, Recall, F1 Score** – Use Cases in Commerce: **Fraud Detection, Customer Churn Prediction – AI-based prediction models in business decision making.**

UNIT IV: Unsupervised Learning and Clustering Techniques (12 Hours)

Clustering Algorithms (K-Means, Hierarchical Clustering)-Dimensionality Reduction-Principal Component Analysis (PCA)-Market Basket Analysis (Association Rule Mining – Apriori Algorithm)-Customer Segmentation and Behavioral Analysis- AI techniques for customer behavior analysis.

UNIT V: ML Tools and Business Decision Making (12 Hours)

Introduction to ML Tools: Excel, Python (Pandas, Scikit-Learn), R-Introduction to Automated ML (AutoML)-Ethical Considerations and Challenges in ML for Commerce-Case Studies: Financial Forecasting, Risk Analysis, and Personalized Marketing- **Introduction to AI tools used in business applications**.

Course Objectives
To Know the concept of Human resource management in an organization.
To apply Recruitment, slection and staffing in selection technique.
To Analyze the training and development in an organization.
To Evaluate the the performance management through performance appraisal
To Create compensation and benefits management in performance system.

Unit 1: Introduction to Human Resource Management (12 Hours)

Definition and scope of HRM - Importance of HRM in organizational success - Evolution of HRM from Personnel Management to Strategic HRM - HRM functions and their role in achieving organizational goals - HRM vs. Traditional Management

Unit 2: Recruitment, Selection, and Staffing (12 Hours)

Recruitment process: internal vs. external sourcing - Job analysis and job design - Selection techniques (interviews, tests, assessments) - Induction and orientation programs - Managing diversity in recruitment and selection

Unit 3: Training and Development (12 Hours)

Importance of training in HRM - Training needs analysis - Designing and implementing training programs - Methods of training (on-the-job vs. off-the-job) - Employee development vs. training - Career planning and development

Ethical Leadership (Dharma)*: The concept of* **Dharma** *in the Bhagavad Gita emphasizes the importance of righteous leadership. Training can focus on ethical decision-making, leading with integrity, and managing challenges with wisdom.*

Unit 4: Performance Management (12 Hours)

Setting performance standards and objectives - Performance appraisal methods (360-degree feedback, self-assessment, etc.) - Reward systems and recognition - Dealing with underperformance and improvement plans -Employee motivation theories (Maslow, Herzberg, McGregor, etc.)

Unit 5: Compensation and Benefits Management (12 Hours)

Compensation strategy and structures -Wage and salary administration - Incentive and bonus systems - Employee benefits (healthcare, retirement plans, etc.) - Legal compliance in compensation (equal pay, labor laws) - Pay-for-performance systems
